1 Introduction

1.1 Examination

The (CRT) Crest Registered Tester examination tests candidates' knowledge in assessing operating systems and common network services at an intermediate level below that of the main CCT qualifications. The CRT examination also includes an intermediate level of web application security testing and methods to identify common web application security vulnerabilities.

The examination covers a common set of core skills and knowledge. The candidate must demonstrate that they can perform an infrastructure and web application vulnerability scan using commonly available tools and interpret the results to locate security vulnerabilities. Success will confer CREST Registered Tester status to the individual.

The CREST Registered Tester Certification qualification is valid for three (3) years.

The Certification Examination has two components: a multiple choice written question section and a practical assessment which is also examined using multiple choice answers. The practical assessment tests candidates' hands-on penetration testing methodology and skills against reference networks, hosts and applications.

1.2 Confidentiality

CREST takes the confidentiality of the Certification Examination very seriously. The retention or dissemination of data relating to the CREST Certification Examination (other than what is contained in the Notes for Candidates and Technical Syllabus documentation that is available from the CREST web site <http://www.crest-approved.org/>) is not permitted: along with their booking forms, candidates must also send a signed Non-Disclosure Agreement to this effect, or be prepared to sign a Non-Disclosure Agreement in the morning before they start the Certification Examination.

It should be noted that prior knowledge of specific Certification Examination configurations will be of little use to candidates, as the Examination is constantly updated and revised.

2 Examination Details

2.1 Written Component

2.1.1 Format

The written component of the CRT Examination will comprise one hundred and twenty (120) multiple choice questions, all of which the candidate must complete.

- The first 20 relate to fundamental knowledge of IT Security
- The next 20 relate to Infrastructure Security Testing
- The next 20 relate to Application Security Testing
- The final 60 are a mix of Infrastructure and Application Security questions

2.1.2 Timings

The written component will last 2 hours in total.

2.1.3 Open Book /Closed Book

The written multiple choice part is a closed book test: candidates will not have access to reference material or the Internet for its duration.

The practical component is conducted as an open book test, reference material or access to the Internet is permitted.

2.2 Practical Component

2.2.1 Format

The practical component of the CRT Examination will comprise a series of stages, split into structured tasks to be carried out against the CREST CRT Network and the target hosts, infrastructure and applications that it comprises. Please note that the practical components are not designed as replicas of “real world” security assessment engagements; rather, they are examinations whose aim is to test the skills and knowledge that security consultants and penetration testers will need to carry out effective security assessment engagements.

As noted above, stages and tasks are designed to examine fundamental infrastructure and web application penetration testing skills at an intermediate level below that of the main CCT qualifications; candidates will be required to complete all of them. Success at each question or task is based on an item or items of information that the candidate must retrieve, acquire or derive from the target applications or infrastructure in order to establish the correct multiple choice answer. The practical components have been designed so that success at each question or task does not depend on success at other questions or tasks.

- The first 20 questions relate to fundamental knowledge of IT Security Infrastructure, each is worth 1 mark.
- The next 12 relate to Windows Infrastructure Security Testing - this comprises of 2 questions which are worth 5 marks and 10 questions which are worth 2 marks.
- The next 12 relate to Unix Infrastructure Security Testing - this comprises of 2 questions which are worth 5 marks and 10 questions which are worth 2 marks.
- The next 20 marks relate to Application Security Testing compromised of 6 questions.

There are 5 possible answers for each question. Only one is correct. If multiple answers are given your answer will be marked as incorrect.

2.2.2 Timings

The practical component will last 2 hours, and is an open book test: candidates will be permitted to use reference material, and, although the CREST CRT Certification Network is not directly connected to the Internet, Internet access will be made available if required. Candidates will be given the practical component worksheet fifteen (15) minutes before the start, to allow its perusal before the examination starts.

There are 100 marks available in the practical exam. This is intended to provide 100 minutes worth of activity with 10 minutes initially to allow network scans to run and 10 minutes at the end to ensure all areas have been covered. This should only be taken as a guideline and actual use of time is at the candidates discretion.

2.2.3 Integrity Protection

Candidates will not be permitted to connect their test platforms to CREST's Internet connection, and any data transfer between the CREST Certification Network and the Internet will be by means of a USB flash drive supplied by the Invigilator. Any attempt to connect the candidate's test platform to the Internet via any means will be considered a breach of the CREST Certification Examination rules and will result in an instant fail decision. Any attempt to retain data relating to the CREST Certification Examinations either locally or by remote upload will be considered a breach of the CREST Certification Examination rules and will result in an instant fail decision. No refund of fees will be considered in these situations.

Note particularly that external media players such as iPods are not permitted in the Certification Examination, unless candidates are prepared to have these wiped (as with any other media used during the Examination). If you would like to listen to music, please put it on your hard drive.

2.2.4 Infrastructure Assessment Details

The practical examination for the infrastructure assessment contains sample equipment that would typically be found in a real world test of a medium to large size organisation. Candidates will be expected to demonstrate their capabilities in and competency at:

- Assessing network devices such as switches and routers
- Assessing hosts running Windows operating systems
- Assessing hosts running Unix (both commercial and open source) operating systems

Knowledge gained will need to be used in an intelligent manner to demonstrate a good understanding of the technologies in use and their implications as well as simply being able to run tools and scripts.

Network mapping and network device assessment stage

The areas of the Technical Syllabus that are covered in the network mapping and network device assessment stage are as follows:

Syllabus area	Syllabus area description
A5	Record keeping, interim reporting & final results
B1	IP protocols
B2	Network architectures
B4	Network mapping & target identification
B5	Interpreting tool output
B6	Filtering avoidance techniques
C2	Domain Name System (DNS)
D1	Management protocols
D2	Network traffic analysis

Syllabus area	Syllabus area description
D3	Networking protocols

For further information, consult the Technical Syllabus.

Unix stage

The areas of the Technical Syllabus that are covered in the Unix stage are as follows:

Syllabus area	Syllabus area description
A5	Record keeping, interim reporting & final results
B5	Interpreting tool output
B8	OS fingerprinting
B9	Application fingerprinting and evaluating unknown services
B13	File system permissions
B14	Audit techniques
F1	User enumeration
F2	Unix vulnerabilities
F3	FTP
F4	Sendmail / SMTP
F5	Network File System (NFS)
F6	R* services
F7	X11
F8	RPC services
F9	SSH
G2	Web servers and their flaws
G4	Web protocols

For further information, consult the Technical Syllabus.

Windows stage

The areas of the Technical Syllabus that are covered in the Windows stage are as follows:

Syllabus area	Syllabus area description
A5	Record keeping, interim reporting & final results
B5	Interpreting tool output
B8	OS fingerprinting
E1	Domain reconnaissance
E2	User enumeration
E3	Active Directory
E4	Windows passwords
E5	Windows vulnerabilities

Syllabus area	Syllabus area description
E8	Exchange
E9	Common Windows applications
G2	Web servers and their flaws
G4	Web protocols
J1	Microsoft SQL Server

For further information, consult the Technical Syllabus.

2.2.5 Web Application Assessment Details

The application assessment consists of multiple single page web applications. The web applications will be based on common web application technologies hosted on Windows and Unix platforms.

Pages have been designed to provide the candidate with a series of generic vulnerabilities to find, assess and exploit.

Candidates will be expected to demonstrate knowledge of the following types of application vulnerability:

Syllabus area	Syllabus area description
A5	Record keeping, interim reporting & final results
C3	Customer web site analysis
G2	Web servers and their flaws
H3	Information gathering from web mark-up
I1	Web site structure discovery
I2	Cross-site scripting attacks
I3	SQL injection
I6	Parameter manipulation
I7	Data confidentiality & integrity
I8	Directory traversal
I9	File uploads
I10	Code injection
I12	Application logic flaws
J1	Microsoft SQL server
J3	Web / App / Database connectivity

2.3 Invigilation

A CREST assessor will be present throughout the day as Invigilator. The Invigilator is not there to assess candidates' capabilities: all assessment is via the objective written and practical components. However, the Invigilator will be able to answer any procedural questions that candidates may have, and assist in troubleshooting.

3 Marking Scheme / Pass Mark

The marking scheme is given in the table below:

Component	Total Marks
Written (multiple choice)	120
Practical	100

Successful candidates must score 60% of the available marks in each component. That is:

- at least **72 marks** from the **written component** (possible total: 120 marks), and
- at least **60 marks** from the **practical component** (possible total: 100 marks).

This represents an overall pass mark of approximately 60%, but note **that candidates must score the minimum number of marks in each section: candidates who score very well in one component but not the other will not pass.**

Unsuccessful candidates will be told their final scores in the written and practical components, along with feedback as to the general areas in which they fell short.

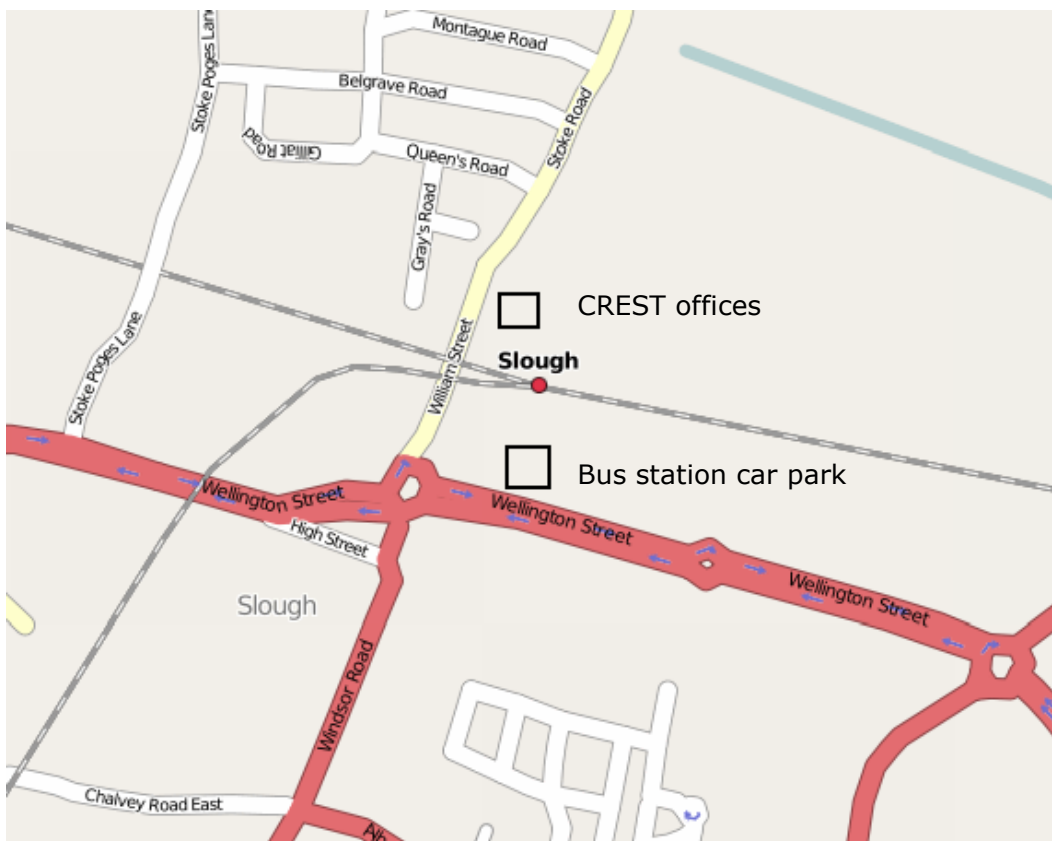

4 Examination Logistics

4.1 Location

The Certification Examination will take place at CREST's offices in Slough:

CREST (GB) Ltd
Abbey Business Centres
18-24 Stoke Road
SLOUGH
Berkshire
SL2 5AG

CREST's offices are approximately 10 minutes' walk from Slough train station: come out of the North entrance (from platform 5; not the main entrance), turn left on Railway Terrace and walk up to the main road, Stoke Road. Then turn right, cross over Stanley Cottages, and the CREST offices are in front of you on the right hand side.

Parking is available in the car park for Slough train station.

Full directions can be found online at <http://www.abbeyoffices.com/ourlocations/slough/map/>, or via Google Maps UK at <http://maps.google.co.uk/maps?q=SL2+5AG>.

4.2 Before the Certification Examinations starts

Before the Certification Examination starts, candidates will:

- **Have their NDAs collected.** This is to help us maintain the confidentiality of the Certification Examination,

4.3 Timing

The general timings of a typical CREST Certification Examination day are as follows.

Candidate 1 - Morning	Candidate 2 - Morning
08:40 Arrive 08:45 Read through worksheet 09:00 Start Practical Exam 11:00 Finish Practical Exam 11:15 Start Written Exam 13:15 Finish Written Exam	08:40 Arrive 09:00 Start Written Exam 11:00 Finish Written Exam 11:00 Read through worksheet 11:15 Start Practical Exam 13:15 Finish Practical Exam
Candidate 3 - Afternoon	Candidate 4 - Afternoon
13:20 Arrive 13:30 Read through worksheet 13:45 Start Practical Exam 15:45 Finish Practical Exam 16:00 Start Written Exam 18:00 Finish Written Exam	13:20 Arrive 13:45 Start Written Exam 15:45 Finish Written Exam 15:45 Read through worksheet 16:00 Start Practical Exam 18:00 Finish Practical Exam

If candidates will be late (e.g. traffic problems / late-running trains), the Invigilator should be contacted on 0845 686 5542 as soon as possible.

4.4 Communication of Results

All written and practical component examination scripts will be marked independently by two CREST Invigilators: this will be completed within five working days of the examination and where possible by the end of the week in which the candidate sits the examination. Results will be communicated by letter to the candidate.

A list of all current CREST Consultants in good standing will be available from the CREST web site, <http://www.crest-approved.org/>.

4.5 Testing Platform Options

4.5.1 Introduction

As noted in sections 1.2 and 2.2.3, CREST takes the confidentiality of the content of the CREST Certification Examinations seriously: candidates are reminded that any attempt to retain data relating to the CREST Certification Examinations either locally or by remote upload will be considered a breach of the CREST Certification Examination rules and will result in an instant fail decision.

In order to help CREST maintain this confidentiality, we do not permit candidates to remove hard disks and writeable media that have been connected to the CREST Certification Network unless they have been securely wiped: we have the facility to do this.

Consequently, CREST requires all candidates to be able (and equipped) to remove their internal hard disk at the end of the exam so that it can be retained by CREST for erasure.

It should be noted that CREST are **UNABLE** to accept responsibility for candidate laptops and only the bare drive will be retained. It is the candidates responsibility to ensure they are competent to remove the disk. Any disk security passwords within the IDE BIOS must be removed.

There is currently only one option available for test platforms.

4.5.2 Option 1: Use own laptop testing platform

Candidates will bring their own testing platform (e.g. laptop with appropriate software toolkit) to the CREST offices. It must have an RJ45 Ethernet connection capable of running at 100Mbps.

The operating systems and tools used must be capable of conducting an infrastructure and web application vulnerability scan using commonly available tools: candidates may use any software tools they deem appropriate, but are responsible for ensuring that any tools used are appropriately licensed and function correctly.

It is important to note that candidates choosing to use their own testing platform **must surrender their hard disk and any other writeable media for wiping at the end of the assessment process**. Hard disks, once wiped, will be returned to the candidates: we envisage that this will be **at the latest** within two weeks of completion of the certification examination.

5 Example questions (written component)

5.1 Written Questions Multiple choice

An example multiple choice question is given below, along with the answer.

5.1.1 Question

Which of the following is NOT a valid DNS record type?

- A. SOA – Start of Authority
- B. NWS – News Server
- C. CNAME – Canonical Name
- D. MX – Mail eXchange
- E. PTR - Domain Name Pointer

Candidates should clearly indicate their answer by circling the appropriate letter in their test script.

5.1.2 Answer

The correct answer is (B).

5.1.3 Marking scheme

Each multiple choice answer is worth one (1) mark. No points are deducted for incorrect answers.

5.2 Practical Questions Multiple choice

An example 1 mark multiple choice question is given below, along with the answer.

5.2.1 Question (1 Mark)

Which version of operating system is installed on the host xx.xx.xx.xx ?

- A. Solaris 9 (x86)
- B. Solaris 9 (SPARC)
- C. Solaris 10 (x86)
- D. Ubuntu 9.01
- E. CentOS 5.1

Candidates should clearly indicate their answer by circling the appropriate letter in their test script.

5.2.2 Answer

The correct answer is (x).

5.2.3 Marking scheme

Each multiple choice answer is worth one (1) mark. No points are deducted for incorrect answers.

An example 5 mark multiple choice question is given below, along with the answer.

5.2.4 Question (5 Mark)

Identify the Crest Trophy String in the file 'Crest-Trophy' using the XXXX service and a common security misconfiguration issue on the host xx.xx.xx.xx ?

- A. RandomStringA
- B. RandomStringB
- C. RandomStringC
- D. RandomStringD
- E. RandomStringE

Candidates should clearly indicate their answer by circling the appropriate letter in their test script.

5.2.5 Answer

The correct answer is (x).

5.2.6 Marking scheme

Each multiple choice answer is worth five (5) marks. No points are deducted for incorrect answers.
